

Software engineering for public-service outcomes.

A focused partner for defined software projects, from discovery and architecture through deployment and knowledge transfer.

COMPANY OVERVIEW

Bellu Development is a North Carolina software engineering firm serving agencies, public organizations, and prime contractors. We design, build, and modernize custom systems for complex operational needs, with clear responsibility for delivery.

CORE CAPABILITIES

Operational applications. Workflow, case management, reporting, administration, and field-service systems.

Application modernization. Legacy replacement and incremental migration, with a focus on accessibility and reliability.

Web & mobile platforms. Portals, responsive applications, and mobile tools for employees, partners, and the public.

Systems integration. APIs, third-party integrations, data synchronization, and event-driven workflows.

AI & automation. Document processing, knowledge workflows, and decision support with human oversight.

Cloud engineering. Cloud architecture, deployment automation, monitoring, and operational reliability.

WHY BELLU DEVELOPMENT

Clear ownership. A defined scope and direct accountability for technical decisions and delivery.

Senior engineering involvement. Work directly with experienced engineers throughout the engagement.

Continuity through modernization. Preserve essential business rules and workflows as existing systems evolve.

Ready for life after launch. Documentation, maintainability, monitoring, and knowledge transfer built into delivery.

SELECTED PRINCIPAL EXPERIENCE

Michaels - Mobile application modernization for store-associate order fulfillment.

CVS Health - Portal functionality supporting nationwide COVID-19 vaccination operations.

Hallmark - Mobile product engineering for consumer card customization.

Experience reflects work performed by Bellu Development's principal in prior engineering roles.
